Canadian Galloway Association

We have been moving forward with promoting our Galloway's here in Canada. We have some new and exciting changes since we last welcome the World Galloway Association from around the world. Please, have a look at our new website for CGA. We are now also able to register on line, with the Canadian Livestock Record Corporation. This fall 2014 we are planning an internet sale of some older Galloway semen that is available.

We continue to promote our cows through Fall Fairs, Royal, Farm Fair, the Outdoor Farm Show and the International Plowing Match in Ontario. We also have started to network with other association such as Rare Breeds, Organic Farming, and Grass feed Beef Conference. The Alberta Association had a display booth at the Bull Congress 2014.

The Alberta Galloway hosted the annual meeting in July 2013 in Red Deer Alberta. Where we had a great time touring the Galloway farmers in the area and our annual meeting was held on Saturday. The Eastern Galloway Association hosted the annual meeting in July 2014 in Stratford, Ontario. We had some farm visits to some of our regular herds, but were able to enjoy the company of several young and newer Galloway members. It was an enjoyable weekend with the meeting taking place on Saturday morning.

We continue to support our youth in the Galloway Association with an increase in numbers showing Galloways. We are also hoping to get a program running to help youth find an animal if they don't own one to show. There are several junior shows in Ontario for the youth to compete against other Galloway cattle as well as other breeds. In the west the Alberta has offer new 4-H programs to support our junior members.

We also have been promoting Galloways around the world with travel to USA for showing and becoming associate member of other Galloway association of the world. As always our doors are always open to other breeders

Marie Blake
President
Canadian Galloway Association
